Rnd 9-13: sc in each st (48)

Put the safety eyes with the white circles between rounds 9 and 10. Pay attention to the positioning so they won't get too much close or far from each other. Between 5 and 6 stitches seems to be the perfect fit for me. Check image #2

DETAILS:

Now that you have all the pieces, let's put it all together! Remember that to attach all the parts to the body, we are going to use the tapestry needle. All the tails must be hidden inside the body.

Here's a tip to place the pieces in a precise way: use pins to attach them to the alien's body, so you'll know exactly where to pass the needle through when sewing.

- Start sewing the head to the body. Sew the white piece of the eyes to the head.

- Sew the legs (stuff them) to the body and be careful with their position. Note that you have 42 stitches at the body to sew the 2 legs, each leg with 21 stitches. Be careful when sewing. Don't pull the thread too much to avoid it from looking like a separated body part. Check image #3.

- Sew the feet to the legs. Check image #4.

- Sew the arms and then the fingers to hands (3 per hand).

- Sew the ears. Note that they are placed a little bellow the eye line.

- Sew the antenna.

- Now pass the belt around the body and sew both ends at the back of the doll. Sew the belt around the body.

Please, do not redistribute this PDF file. My blog has several free amigurumi patterns.

Notice: Don't leave small amigurumi pieces near unattended children due to the risk of swallowing it. Also, keep in mind that is always better to use anti-allergic yarn if the amigurumi is going to be constantly manipulated (used as a toy).
